

POSSO VENTURES

SAVINGS, INVESTMENT & BUSINESS DEVELOPMENT PROPOSAL

Kigali, Rwanda | 10 Members | Save 2 Years · Grow 3 Years · Benefit from Year 5

 Members	 Monthly / Person	 Saving Period	 Total Capital	 Winery Launch
10 People	100,000 Frw	Year 1 & 2 ONLY	24,000,000 Frw	Year 6

PREAMBLE & GROUP VISION

We, the undersigned members of POSSO Ventures, voluntarily agree to establish a disciplined savings and investment group with the objective of improving our financial lives, building sustainable businesses, creating employment opportunities, and achieving long-term collective wealth.

Our Vision in One Sentence

Ten disciplined people. Two years of saving. Five years of building.

A lifetime of shared prosperity — through a Bakery, Avocado Farm, Mushroom Cultivation, and a Beetroot & Grape Winery, and Finally Health Care Clinic.

PART 1 — THE SAVINGS ENGINE (2 YEARS ONLY)

1.1 How the Money Accumulates

Each of our 10 members contributes exactly 100,000 Frw every month for 24 months — and then saving stops completely. The businesses we build take over from there.

Period	Monthly Pool	Annual Total	Cumulative Total
Month 1 – 12 (Year 1)	10 × 100,000 Frw	12,000,000 Frw	12,000,000 Frw
Month 13 – 24 (Year 2)	10 × 100,000 Frw	12,000,000 Frw	24,000,000 Frw
Month 25 onwards	Saving STOPS	0 Frw	24,000,000 Frw (FINAL)

What Every Member Commits

Monthly contribution: 100,000 Frw

Duration: 24 months (Year 1 and Year 2 only)
 Total personal investment: 100,000 × 24 = 2,400,000 Frw per member
 Total group capital raised: 24,000,000 Frw

After Month 24 — no further contributions. The investments work for you.

PART 2 — YEAR 1 INVESTMENTS: BAKERY & AVOCADO FARM (12,000,000 Frw)

2.1 Capital Allocation — End of Year 1

Investment	Capital Allocated	Purpose
🌿 Agricultural Land + Avocado Plantation	6,000,000 Frw	Buy productive garden; plant avocado trees
🍞 Bakery Business (Kigali Launch)	6,000,000 Frw	Establish professional bakery — daily cash flow
TOTAL YEAR 1	12,000,000 Frw	Both assets launched simultaneously

A) Avocado Farm & Agricultural Land — 6,000,000 Frw

We purchase productive land near Kigali and plant 200–300 Hass avocado trees alongside other profit-generating crops. Avocado trees mature in 3–4 years and produce fruit for 40–80 years.

Item	Detail	Cost (Frw)
Land purchase	Productive garden suitable for avocado	4,200,000
Avocado seedlings (200–300 trees, Hass variety)	High market demand locally & regionally	300,000
Soil preparation & planting labour	Land clearing, hole digging, planting	500,000
Irrigation system & security fencing	Basic water access + perimeter fence	600,000
Year 1 maintenance reserve	Fertiliser, pest control, skilled farm labour	400,000
TOTAL		6,000,000 Frw

Avocados begin fruiting in Year 3 and reach peak production by Year 5. Once mature, a single tree yields 200–400 fruits per season. This becomes a perpetual, low-cost income stream for decades.

B) Bakery Business (Kigali) — 6,000,000 Frw

A professional bakery supplying households, schools, offices, restaurants, and supermarkets across Kigali. The bakery begins generating cash flow within 6 months of launch.

Item	Detail	Cost (Frw)
Commercial equipment (oven, mixer, proofers)	Professional-grade production tools	2,800,000
Premises deposit + interior fit-out	3 months deposit + setup in Kigali	1,200,000
Initial raw materials (2 months stock)	Flour, yeast, sugar, oil, packaging	700,000
Packaging, branding & launch marketing	Brand identity, social media, flyers	500,000
Staff salaries — ramp-up phase (2 bakers)	2 months salaries during launch	500,000
Licences, food safety & business registration	Rwanda food permit + business licence	300,000
TOTAL		6,000,000 Frw

PART 3 — YEAR 2 INVESTMENTS: BAKERY BOOST + RESERVES (12,000,000 Frw)

3.1 Capital Allocation — End of Year 2

The final 12,000,000 Frw from member savings is deployed to expand the bakery, care for the farm, and build a strong financial reserve that supports Years 3–5 operations and winery preparation.

Investment	Capital Allocated	Purpose
 Bakery Expansion & Boost	4,200,000 Frw	Upgrade equipment, add delivery, grow product range
 Avocado Farm Operations Reserve	1,000,000 Frw	Year 3–4 care, irrigation upgrade, new crop varieties
 Group Emergency, Operations & Reserve Fund	6,800,000 Frw	Working capital buffer + winery preparation funding base
TOTAL YEAR 2	12,000,000 Frw	Saving phase complete — businesses grow from here

Bakery Boost Detail — 4,200,000 Frw

Boost Area	Detail	Budget (Frw)
Additional production oven + larger mixer	Increase daily output capacity	1,200,000

Boost Area	Detail	Budget (Frw)
Delivery motorcycle + route setup	Supply restaurants, schools, offices daily	2,000,000
New product lines (cakes, pastries, catering)	Expand revenue beyond basic bread	500,000
Marketing campaign (radio, social media, flyers)	Grow customer base aggressively	300,000
Raw material working capital buffer	2 months extra stock reserve	200,000
TOTAL		4,200,000 Frw

End of Year 2 — Saving Phase Complete

- ✓ Both Years of member contributions fulfilled — 24,000,000 Frw raised and deployed.
- ✓ Bakery: well-established with delivery operations and growing customer base.
- ✓ Avocado farm: trees in Year 2 of growth — nearing first fruiting phase.
- ✓ Reserve fund: 6,800,000 Frw held for operations, emergencies, and winery prep.
- ✓ Members: no distributions yet — all profits reinvested through Year 4.

PART 4 — YEARS 3 & 4: GROWTH PHASE (NO MEMBER SAVINGS NEEDED)

From Year 3 onward, members make no further contributions. The bakery and avocado farm generate profits that are reinvested to expand operations and prepare for Year 5 distributions and the Year 6 winery launch.

4.1 Bakery Revenue Growth — Years 1 to 5

Year	Stage	Monthly Revenue	Annual Revenue	Costs (~55%)	Annual Profit
Year 1	Setup & launch	0 Frw	0 Frw	—	0 Frw (reinvest)
Year 2	Early sales building	500,000 Frw	6,000,000 Frw	3,300,000 Frw	2,700,000 Frw
Year 3	Established & growing	900,000 Frw	10,800,000 Frw	5,940,000 Frw	4,860,000 Frw
Year 4	Expanded + delivery	1,400,000 Frw	16,800,000 Frw	9,240,000 Frw	7,560,000 Frw
Year 5	Mature — distribute	2,000,000 Frw	24,000,000 Frw	13,200,000 Frw	10,800,000 Frw

4.2 Avocado Farm Revenue Growth — Years 1 to 5

Year	Stage	Annual Harvest Revenue	Costs (~30%)	Annual Profit
Year 1–2	Planting & growing — no harvest	0 Frw	—	0 Frw

Year	Stage	Annual Harvest Revenue	Costs (~30%)	Annual Profit
Year 3	First meaningful harvest	1,500,000 Frw	450,000 Frw	1,050,000 Frw
Year 4	Full partial yield	4,000,000 Frw	1,200,000 Frw	2,800,000 Frw
Year 5	Peak production	8,000,000 Frw	2,400,000 Frw	5,600,000 Frw
Year 6+	Mature orchard — perpetual income	12,000,000+ Frw	3,600,000 Frw	8,400,000+ Frw

Avocado trees produce fruit for 40–80 years with minimal replanting cost. From Year 5, this becomes one of the group's most reliable long-term income streams.

4.3 Years 3 & 4 — How Profits Are Reinvested

All profits from Years 3 and 4 are pooled and used to prepare every asset for full distribution in Year 5, and to build the capital base for the Year 6 winery launch.

Reinvestment Area	Year 3	Year 4	Purpose
Avocado farm — soil, irrigation, care	500,000 Frw	300,000 Frw	Maximise Year 5 harvest output
Mushroom cultivation — setup begins	0 Frw	2,000,000 Frw	Infrastructure ready for Year 5 launch
Winery preparation fund (accumulate)	2,000,000 Frw	5,000,000 Frw	Certifications, permits, equipment quotes
Group reserve & emergency buffer	1,500,000 Frw	1,000,000 Frw	Financial safety net for all businesses
Total reinvested	~4,000,000 Frw	~8,300,000 Frw	From bakery + avocado profits

PART 5 — YEAR 5: FIRST MEMBER DISTRIBUTIONS + MUSHROOM LAUNCH

Year 4 is the turning point. All reinvestment stops. The bakery is at full strength, avocados are at peak yield, and at Year 5 the group has accumulated enough from profits to distribute 30,000,000 Frw among members — while simultaneously launching mushroom cultivation and beginning formal winery preparations.

5.1 Year 5 — Total Group Profit Pool

Income Stream	Annual Revenue	Operating Costs	Annual NET Profit
 Bakery (mature, delivery established)	24,000,000 Frw	13,200,000 Frw (55%)	10,800,000 Frw
 Avocado Farm (peak harvest)	8,000,000 Frw	2,400,000 Frw (30%)	5,600,000 Frw
 Mushroom Cultivation (Year 5 launch — partial)	5,000,000 Frw	2,500,000 Frw (50%)	2,500,000 Frw

Income Stream	Annual Revenue	Operating Costs	Annual NET Profit
📁 Reserve fund income / interest	2,000,000 Frw	—	2,000,000 Frw
🍷 Winery prep — no revenue yet	0 Frw	—	0 Frw
TOTAL YEAR 5 NET PROFIT	39,000,000 Frw+		~30,000,000 Frw distributed

5.2 Member Distributions — Year 5

The group distributes exactly 30,000,000 Frw among the 10 members in Year 5. This is each member's first return on their investment.

	Amount
Total group profit distributed in Year 5	30,000,000 Frw
Number of members	10
Each member receives — Year 5	3,000,000 Frw
Each member's total contribution (2 years)	2,400,000 Frw
Net gain per member in Year 5 alone	+600,000 Frw above their contribution
Return on Investment (Year 5)	125% — members get back MORE than they put in

🔑 Year 5 Member Benefit — Clear Summary

You saved: 100,000 Frw × 24 months = 2,400,000 Frw total

You receive in Year 5: 3,000,000 Frw cash distribution

Net gain: +600,000 Frw MORE than you contributed — in the very first year of returns.

AND the group still owns the bakery, avocado farm, and growing mushroom operation — all continuing to generate income for you in Year 6, 7, 8 and beyond.

Your original investment was NOT spent. It now owns a share of assets worth tens of millions.

5.3 Mushroom Cultivation Launch — Year 5

Alongside the first member distributions, the group launches mushroom cultivation using profits accumulated in Year 4. Mushrooms grow fast, sell fresh daily, and require minimal land. This adds a rapid-cycle income stream to complement the longer-cycle avocado farm.

Item	Detail	Cost (Frw)
Growing space preparation (indoor / shade house)	Temperature-controlled environment	600,000
Substrate & spawn (oyster + shiitake mushrooms)	Initial production stock	400,000

Item	Detail	Cost (Frw)
Shelving, bags, humidity equipment	Growing infrastructure	500,000
Packaging materials (branded punnets)	Fresh market presentation	200,000
Staff — 1 mushroom production manager	Dedicated skilled worker	300,000
TOTAL LAUNCH COST		2,000,000 Frw (funded from Year 4 profits)

Mushroom Revenue Projection	Year 5 (Partial)	Year 6	Year 7+
Monthly output (kg)	100 kg	250 kg	400 kg
Price per kg (Kigali market)	2,500 Frw	2,500 – 4,000 Frw	2,500 – 4,000 Frw
Monthly Revenue	~250,000 Frw	~750,000 Frw	~1,200,000 Frw
Annual Revenue	~3,600,000 Frw	~9,000,000 Frw	~14,400,000 Frw
Annual Profit (~50%)	~1,800,000 Frw	~4,500,000 Frw	~7,200,000 Frw

Mushrooms grow in cycles of 4–6 weeks. Fresh oyster and shiitake mushrooms sell to supermarkets, restaurants, and Kigali's growing health-conscious consumer market at premium prices.

5.4 Winery Preparation — What Happens in Year 5

While members collect their first distributions and mushroom cultivation launches, the group simultaneously completes all groundwork needed to launch the winery at the start of Year 6. Not a single franc of member money is used for this — it is funded entirely from retained business profits.

Preparation Task	Responsible Party	Target Completion
Rwanda Revenue Authority — business registration update	Group Secretary + Lawyer	Month 1, Year 5
Rwanda Food & Drugs Authority (FDA) — winery licence application	Appointed compliance officer	Month 2–4, Year 5
Alcoholic beverages production permit — Rwanda Bureau of Standards	Legal representative	Month 3–5, Year 5
Health & safety certification for production facility	Group Treasurer + consultant	Month 4–6, Year 5
Site identification — winery premises lease / purchase	Business committee	Month 1–3, Year 5
Equipment sourcing — fermentation tanks, press, filters, pumps	Production committee	Month 4–8, Year 5
Bottle & packaging supplier contracts (bottles, corks, labels)	Procurement manager	Month 6–9, Year 5
Beetroot & grape supplier agreements — local farmers	Agriculture liaison	Month 3–6, Year 5
Hire winemaker / production consultant	HR committee	Month 8–10, Year 5

Preparation Task	Responsible Party	Target Completion
Trial batch production & quality testing	Winemaker + full group	Month 10–12, Year 5
Label design, brand identity & marketing strategy	Marketing team	Month 6–10, Year 5
Hotel, restaurant & event client pre-sales outreach	Sales committee	Month 9–12, Year 5
WINERY READY FOR FULL LAUNCH	All committees	Month 12, Year 5 / Start of Year 6

Year 5 Winery Budget — Fully Funded from Group Profits

Winery preparation costs (Year 5): ~3,000,000 Frw

Source: Retained business profits from Years 3–4 (NOT member contributions)

Members' 2,400,000 Frw investment is never touched for winery preparation.

The winery 15,000,000 Frw launch capital comes from Year 5 profits — see Part 6.

PART 6 — YEAR 6: BEETROOT & GRAPE WINERY LAUNCH (15,000,000 Frw)

The winery launches in Year 6 — fully funded from Year 5 group profits. It is our most ambitious and highest-potential brand, producing premium beetroot and grape wine sold across Kigali and gradually exported to the East African region.

6.1 Winery Launch Budget — 15,000,000 Frw

The 15,000,000 Frw investment is funded entirely from Year 5 business profits. Zero member contributions required.

Investment Item	Budget (Frw)	Detail
Winery premises (lease — 3 years advance)	2,500,000	Production facility, accessible from Kigali
Fermentation tanks — stainless steel (3 × 5,000L)	4,000,000	High-grade tanks for 10,000-litre capacity
Grape & beetroot press machine	1,500,000	Commercial fruit press — core production equipment
Filtration system, pumps, transfer hoses	800,000	Food-grade filtration for clear, quality wine
Cooling & temperature control system	600,000	Critical for fermentation quality
Bottle-filling & corking machine (semi-auto)	700,000	Speed and hygiene in bottling process
Year 1 raw materials — beetroot & grapes	1,200,000	Sourced from Rwandan farmers — 10,000 litres input

Investment Item	Budget (Frw)	Detail
Bottles, corks, capsules (Year 1 stock)	1,000,000	25,500 bottles at first full production
Label printing & branded packaging	500,000	Professional design — restaurant & hotel ready
All winery permits & certifications	400,000	RBS, FDA, alcoholic beverages licence — already applied in Yr 5
Winemaker salary (12 months)	800,000	Experienced production manager
Production assistants (2 people, 12 months)	600,000	Bottling, cleaning, logistics team
Marketing launch — restaurants, hotels, events	400,000	Tastings, social media, trade fairs
TOTAL WINERY INVESTMENT	15,000,000 Frw	100% from Year 5 group profits

6.2 Production Model — 10,000 Litres Per Brew Cycle

We brew 10,000 litres per production cycle. Applying a realistic 15% loss rate for fermentation waste, spillage, and quality control rejection, we end with 8,500 litres of sellable wine per cycle.

Production Step	Volume / Detail	Notes
Raw material input (beetroot + grapes)	10,000 litres fermentation volume	Sourced from Rwandan farmers
Expected losses (15%) — fermentation, QC, spillage	1,500 litres lost	Industry-standard conservative estimate
Sellable wine output per cycle	8,500 litres	Cleared, filtered, quality-approved
Bottles per litre (330cl per bottle = 3 bottles/litre)	3 bottles per litre	Standard 330cl wine bottle
Total bottles produced per cycle	$8,500 \times 3 = 25,500$ bottles	Per full brew cycle
Selling price per bottle (conservative)	9,000 Frw	Below premium market — builds volume fast
Gross revenue per full brew cycle	$25,500 \times 9,000 = 229,500,000$ Frw	Full cycle at 9,000 Frw/bottle

Why 9,000 Frw per Bottle is the Right Price

Premium imported wines in Kigali sell for 15,000 – 40,000 Frw per bottle.

At 9,000 Frw we undercut every imported competitor while remaining a premium local product.

This builds rapid volume, loyal customers, and strong word-of-mouth among restaurants and hotels.

We can increase price to 12,000 – 15,000 Frw by Year 8 once the brand is established.

6.3 Annual Winery Revenue — Year 6 to Year 15 (10-Year Projection)

Year 6 starts at 50% capacity as we build client relationships and refine production. By Year 7 we reach full single-cycle capacity, and from Year 8 we run two brew cycles per year — doubling output and revenue.

Year	Capacity / Cycles	Bottles Produced	Revenue (9,000 Frw/bottle)	Total Costs (~55%)	NET PROFIT	P
Year 6	50% — 1 cycle	12,750 bottles	114,750,000 Frw	63,112,500 Frw	51,637,500 Frw	5,
Year 7	100% — 1 full cycle	25,500 bottles	229,500,000 Frw	126,225,000 Frw	103,275,000 Frw	1,
Year 8	2 cycles / year	51,000 bottles	459,000,000 Frw	252,450,000 Frw	206,550,000 Frw	2,
Year 9	2 cycles / year	51,000 bottles	459,000,000 Frw	252,450,000 Frw	206,550,000 Frw	2,
Year 10	2 cycles / year	51,000 bottles	459,000,000 Frw	252,450,000 Frw	206,550,000 Frw	2,
Year 11–15	2 cycles — price rises to 12,000 Frw	51,000 bottles	612,000,000 Frw	252,450,000 Frw	359,550,000 Frw	3,
10-YEAR TOTAL (Yr 6–15)			~3,800,000,000 Frw		~1,710,000,000 Frw	~F

Costs include: raw materials (beetroot & grapes), bottles & packaging, staff salaries, premises rent, utilities, maintenance, permits and marketing. Estimated at 55% of revenue — a conservative margin for a production business.

The Winery — 10 Years in Numbers

Year 6: Each member receives 5,163,750 Frw from winery alone

Year 7: Each member receives 10,327,500 Frw from winery alone

Year 8+: Each member receives 20,655,000+ Frw per year from winery alone

Remember: the bakery, avocado farm, and mushroom farm are also still running and generating additional income on top of these winery figures.

Total personal investment per member: 2,400,000 Frw (24 months of saving)

By Year 8, winery income alone is ~860% of their total investment — every single year.

PART 7 — COMPLETE MEMBER BENEFIT PROJECTION (Years 5 – 10)

The table below shows what each individual member receives annually from every income stream — clearly and conservatively calculated.

7.1 Per-Member Annual Income — All Streams Combined

Year	Bakery (÷10)	Avocado (÷10)	Mushroom (÷10)	Winery (÷10)	TOTAL PER MEMBER	Monthly Equiv.
Year 1	0	0	0	0	0 (investing)	—
Year 2	0	0	0	0	0 (investing)	—
Year 3	0	0	0	0	0 (reinvest)	—
Year 4	0	0	0	0	0 (reinvest)	—
Year 5	1,080,000	560,000	180,000	0 (prep)	3,000,000 Frw	250,000 Frw
Year 6	1,200,000	700,000	450,000	5,163,750	7,513,750 Frw	626,146 Frw
Year 7	1,500,000	840,000	600,000	10,327,500	13,267,500 Frw	1,105,625 Frw
Year 8	1,800,000	960,000	720,000	20,655,000	24,135,000 Frw	2,011,250 Frw
Year 9	2,000,000	960,000	720,000	20,655,000	24,335,000 Frw	2,027,917 Frw
Year 10	2,200,000	960,000	720,000	20,655,000	24,535,000 Frw	2,044,583 Frw

What This Means for Every Member

Year 5: 3,000,000 Frw (you recover your 2,400,000 Frw investment + 600,000 Frw profit)

Year 6: 7,513,750 Frw (~626,000 Frw every month)

Year 7: 13,267,500 Frw (~1,105,000 Frw every month)

Year 8+: 24,000,000+ Frw (~2,000,000 Frw every month)

All of this from a total investment of 2,400,000 Frw made over 2 years.

The winery alone — starting Year 6 — multiplies your wealth every single year.

PART 8 — GROUP TOTAL ASSET VALUE AT YEAR 10

Beyond the annual income streams, the group will own significant physical and business assets that continue growing in value. These can be sold, borrowed against, or expanded at any time.

Asset	Total Group Investment	Estimated Market Value — Year 10
🌿 Avocado land + 200–300 mature trees (40+ yr lifespan)	6,000,000 Frw	25,000,000 – 40,000,000 Frw
📦 Bakery — established brand, equipment, 1–2 locations	~10,000,000 Frw	20,000,000 – 35,000,000 Frw

Asset	Total Group Investment	Estimated Market Value — Year 10
🍷 Winery — equipment, brand, licences, wine stock	15,000,000 Frw	80,000,000 – 150,000,000 Frw
🍄 Mushroom farm — equipment, brand, distribution	2,000,000 Frw	8,000,000 – 15,000,000 Frw
TOTAL GROUP ASSET VALUE	~33,000,000 Frw invested	133,000,000 – 240,000,000 Frw
PER MEMBER ASSET STAKE (÷10)	2,400,000 Frw contributed	13,300,000 – 24,000,000 Frw

PART 9 — COMPLETE YEAR-BY-YEAR ROADMAP

Year	Members Save?	Capital Deployed	Key Activity	Member Benefit
Year 1	YES — 12,000,000	12,000,000 Frw	Launch Bakery + Plant Avocado Farm	Nothing — invest
Year 2	YES — 12,000,000	12,000,000 Frw	Boost Bakery + Build Reserves	Nothing — invest
Year 3	NO — saving stops	Profits reinvested	Bakery grows — avocado matures	Nothing — reinvest
Year 4	NO	Profits reinvested	Mushroom setup — winery fund builds	Nothing — reinvest
Year 5	NO	0 from members	First distributions + Mushroom launch + Winery prep	3,000,000 Frw each
Year 6	NO	15M from profits	WINERY LAUNCHES — full production begins	~7,513,750 Frw each
Year 7	NO	Reinvest expansion	Winery full cycle — all streams growing	~13,267,500 Frw each
Year 8+	NO	2 winery cycles	Peak operations — maximum returns	~24,000,000+ Frw each

GROUP PURPOSE & OBJECTIVES

The primary purpose of this group is to bring together committed individuals who share a common vision of improving their financial future through discipline, cooperation, savings, investment, and entrepreneurship.

1. Build Financial Discipline Through Regular Savings

The group encourages all members to develop a strong culture of saving consistently. Every member commits 100,000 Frw monthly for exactly 24 months.

- Create financial stability and emergency resilience
- Develop self-discipline and reduce unnecessary personal spending
- Build collective capital for strategic, long-term investment
- Demonstrate to future generations the power of collective saving

2. Provide Internal Loans to Members

The group establishes an internal loan system allowing members to access financial assistance at reasonable interest rates — eliminating dependence on high-interest external borrowing during the 5-year investment phase.

3. Invest in Profitable, Sustainable Businesses

The group identifies, evaluates, and invests in businesses that are practical, profitable, legally compliant, and community-positive — starting with the Bakery and Avocado Farm, growing into Mushroom Cultivation, and culminating in the Beetroot & Grape Winery.

4. Create Long-Term Wealth and Generational Assets

Beyond individual income, the group builds assets — the farm, the winery brand, the bakery — that grow in value for decades. These assets can eventually be passed on, sold, or expanded into the next generation of ventures.

LONG-TERM VISION — FUTURE BUSINESS SECTORS

1. Beetroot & Grape Winery

Our flagship premium brand — producing natural wines from local Rwandan beetroot and grapes. Targeting restaurants, hotels, supermarkets, weddings, corporate events, and eventual regional export across East Africa.

2. Mushroom Cultivation & Production

Fresh oyster and shiitake mushrooms grown in controlled indoor environments. Sold fresh daily to Kigali supermarkets, restaurants, health stores, and clinics. Short growth cycles (4–6 weeks) mean rapid, recurring cash flow.

3. Bakery Business

A professional Kigali bakery producing bread, cakes, pastries, catering packs, and snacks — supplying schools, hotels, restaurants, supermarkets, events, and households across the city.

4. Avocado & Agricultural Production

A long-term agricultural income stream — 200–300 Hass avocado trees on productive Kigali-area land, yielding harvests for 40–80 years. Additional companion crops and seasonal vegetables may be added as the farm matures.

5. Fresh Goods Transportation (Future — Year 7+)

A logistics and fresh-produce delivery service — transporting agricultural products from rural farms to Kigali urban customers. Connects naturally with the winery's raw material supply chain and the mushroom farm's distribution.

CORE VALUES

Value	What It Means in Practice
Discipline	100,000 Frw paid on the agreed date every month — no exceptions
Integrity	Every transaction is recorded, reported, and verified openly
Accountability	Each member owns the consequences of their actions and decisions
Transparency	Monthly financial statements shared with all 10 members
Unity	Major decisions require majority agreement — we move as one
Hard Work	Active participation in monitoring and supporting all businesses
Respect	Every member treated with equal dignity regardless of role or wealth
Confidentiality	Group finances and strategy are never shared with outsiders

MEMBERSHIP REQUIREMENTS

Membership is not only about contributing money. It is about bringing discipline, ideas, integrity, and active participation toward the long-term success of the group.

Financial Commitment

- Contribute exactly 100,000 Frw monthly for 24 consecutive months
- Total personal investment: 2,400,000 Frw — then no further contributions
- No early withdrawal of capital during the 5-year investment phase
- Repay any internal loans on the agreed schedule and with agreed interest

Active Participation

- Attend all monthly meetings or submit a written update in advance
- Actively propose business ideas, market opportunities, and problem solutions
- Monitor assigned business performance and report to the group
- Support group decisions constructively — even when not your first preference

Integrity & Conduct

- Act with complete honesty in all group-related matters
- Disclose any conflict of interest with group businesses immediately
- Maintain full confidentiality of group finances, strategy, and member information
- Protect the reputation of POSSO Ventures at all times

OPERATIONAL APPROACH

Pillar	How We Practice It
Savings-Based Growth	Regular savings for 2 years create the foundation. Every month of discipline compounds into collective wealth.
Internal Financial Support	Members may access interest-bearing internal loans from the group reserve — reducing dependence on banks.
Collective Investment	All major investments are voted on by all members before execution. Transparency is non-negotiable.
Entrepreneurship	We constantly identify new opportunities. The winery, mushroom farm, and future ventures show our growth mindset.
Financial Sustainability	Conservative projections, reinvestment before distribution, and emergency reserves protect us from setbacks.

DIGITAL MANAGEMENT & LEGAL REGISTRATION

Digital Management System

The group will use a digital platform to manage all financial tracking, reporting, and communication — accessible to all members regardless of location.

- Monthly savings contributions tracking and receipts
- Business revenue and profit reporting dashboards
- Internal loan management and repayment schedules
- Digital voting for major decisions
- Secure member communication group (WhatsApp + formal email)
- Annual financial statements prepared by appointed secretary

Legal Registration Objectives

POSSO Ventures will be legally registered under Rwandan law to ensure full protection, credibility, and operational capacity.

- Official recognition as a savings and investment cooperative or company
- Group bank account in the organization's name — not any individual member
- Ability to sign supplier and client contracts in the group's name
- Legal framework for the winery and mushroom farm licences
- Tax compliance for all business activities

FUTURE GOVERNANCE & OPERATIONAL FRAMEWORK

The following policies will be developed and formally adopted at group meetings before Year 1 operations begin:

- Leadership structure: Chairperson, Secretary, Treasurer, Business Managers per venture
- Internal loan rules: eligibility, interest rates, maximum amounts, repayment terms
- Monthly financial reporting: full statements at every meeting, signed by Treasurer
- Year 5+ profit distribution formula and annual payment schedule
- Member exit policy: how a member may transfer or sell their group stake fairly
- New member admission: criteria, valuation, and vote process
- Dispute resolution: internal mediation before any external process
- Investment approval: majority vote (6/10) required for any expenditure above 500,000 Frw
- Annual independent audit by a certified external accountant
- Penalty structure for late contributions, missed meetings, or misconduct

All members agree that these provisions shall be developed collectively in the spirit of transparency, accountability, professionalism, and long-term organisational sustainability.

MEMBER COMMITMENT & SIGNATURES

By signing below, I confirm that I have read and fully understood this proposal. I agree to contribute 100,000 Frw monthly for 24 months (total personal investment: 2,400,000 Frw). I understand that distributions begin in Year 5, and I commit to the rules, vision, and collective success of POSSO Ventures for the duration of this agreement.
